## PROJECT HIGHLIGHTS

---

- **Farmhouse Academy (MERN Project)** [Live Preview](#) | [GitHub](#) - [Client](#) | [Server](#)

Introducing **Farmhouse Academy**: A full-stack football academy website.

- Implemented authentication & authorization: Only users can visit the dashboard. Students, and instructors & admin each have a dedicated dashboard based on their role.
- Students can see their selected classes and can do payments. Instructors can add classes and see the added classes.
- Admin can see all the users and switch between admin and instructors.

**Technologies:** React - Tailwind - Firebase - MongoDB - Express - JWT - Stripe

- **Four Wheelers (MERN Project)** [Live Preview](#) | [GitHub](#) - [Client](#) | [Server](#)

Introducing **Four Wheelers**: A full-stack toy vehicles website that sells vehicle toys.

- A shop-by-category section shows data according to the category clicked.
- Authentication functionality. Only registered users can add a new toy.
- Has a toys section where all the toys and their details can be found. Each page appears with the appropriate title.

**Technologies:** React - Tailwind - Firebase - MongoDB - Express - AOS

- **Ristorante Italiano (REACT Project)** [Live Preview](#) | [GitHub](#) - [Client](#) | [Server](#)

Introducing **Ristorante Italiano**: A Front End Focused Italian food recipe website.

- This website has authentication functionality including login with Google and Git Hub.
- Nonusers can not visit the recipe page hence redirected to the login page. Has various recipes by different chefs. Has a newsletter section to get new recipes.
- Has a collapsible menu for mobile devices

**Technologies:** React - React Bootstrap - Firebase - Vercel
